

AS the World Turns

Spatial disorientation is a silent killer and most pilots do not include it's consideration in their ADM process. Through a series of interactive scenarios the common causes of spatial disorientation will be discussed and potential defenses presented. The Barony Chair will be available for anyone wishing to experience spatial disorientation in a safe environment.

Directions: CAP hangar is on the south side of runway 28 across from the fire station. If driving, map is attached and the gate will be open at 0930. Do not park in front of CAP hangar or the fire station. If flying, limited tie down space is available on northwest side of CAP hangar. Fuel is available at this location but expect delays. Other tie downs are available at Santa Fe Air Center and you can request transport to the CAP hangar at the SFAC service desk (expect delays).

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
